

Kevin Ortega Okhuysen

FullStack Developer · Web & Mobile

Tijuana, Baja California | +52 663 215 3454 | okhuysen.dev@gmail.com | github.com/Kevin180317 | okhuysen.dev | okhuysen.me

PROFILE

FullStack Developer with 5+ years of experience building scalable web and mobile applications for clients in the medical, dental, logistics, and e-commerce sectors. Specialized in modern frontend ecosystems (React, Next.js, Astro) and backend development with Node.js and Express. Proven track record delivering 30+ production projects for clients in Mexico and the United States.

AREAS OF EXPERTISE

Web Development · Mobile Development · Frontend · Backend · REST APIs · Databases · SEO & Analytics · Version Control · Authentication & OAuth · cPanel Deployment

PROFESSIONAL EXPERIENCE

Ecommetrica September 2023 – Present

Frontend / FullStack Developer

- Developed and maintained 20+ client websites using React, Next.js, Astro, and Vite across medical, dental, real estate, and e-commerce industries.
- Built RESTful APIs with Express.js using JWT and OAuth authentication, integrated with MySQL and Supabase databases.
- Delivered ScanEat — a full web app for restaurants with QR digital menus, real-time order management (KDS), invoicing, and reporting.
- Implemented Stripe payment gateways for e-commerce and appointment booking platforms (Reforma Dental, Seiza Shop).
- Improved client SEO via Google Analytics, Meta Pixel, and Google Tag Manager, achieving measurable organic traffic growth.
- Designed UI/UX in Figma; managed tasks and sprint planning via Todoist and Slack.

PrometheusTij 2022 – 2023

Mobile & Web Developer

- Architected a cross-platform palliative care mobile app (Android Java / iOS Swift) allowing patients to browse doctor catalogs and schedule appointments — similar UX to Doctoralia.
- Integrated Google Firebase (Firestore, Auth) and OneSignal push notifications for real-time appointment updates.
- Built corporate landing pages for PrometheusTij and Akerlundh Interiorismo using Astro, Tailwind CSS, Node.js, and Express.
- Developed Lucky Tracker — a community-driven lost pet tracking app with real-time location alerts (Next.js).

Cenya University October 2022 – July 2023

FullStack Developer (Contract)

- Designed and built a full academic management platform with three role-based modules: Students, Teachers, and Academic Control.

- Stack: Laravel (PHP), Vue.js, Tailwind CSS, MySQL — delivered end-to-end from architecture to production deployment.

Freelance 2021 – Present

Independent Developer

- Delivered 10+ freelance projects: Macoti (CNC company, Next.js), Transtime (logistics, Astro), Jaredo Sushi (mobile menu, React), Crioste (investigations, Astro/React), and an Internal Administrative System for a law firm (React, Express, MySQL).

EDUCATION

B.Sc. Intelligent Systems Technology — UDCI 2017 – 2021

Relevant coursework: Software & Hardware, Python, Embedded Systems, Robotics (line-follower, autonomous bots 5–15 kg).

SKILLS

Frontend: HTML, CSS, JavaScript, TypeScript, React, Vue.js, Angular, Astro, Next.js, Tailwind CSS, Bootstrap

Backend: Node.js, Express.js, Laravel (PHP), REST APIs, JWT, OAuth
